

Brief Summary of CYGNI Energy's participation

at

International Innovation Fair

Visakhapatnam, 9-11th September, 2017

The International Innovation Fair in Vizag City was organised by the Govt. of Andhra Pradesh in association with International Federation of Inventors' Associations and Indian Innovators Association (IIA).

The event was a grand success with participation from over 40 countries, and from states all over India. Participants showcased their unique inventions and products, to a huge footfall of inquisitive audience. It was a three day event with the final day seeing the presence of the Hon'ble Chief Minister of Andhra Pradesh Sri N. Chandrababu Naidu. He visited each stall individually and appreciated the enthusiasm of all the innovators.

The Chief Minister was particularly impressed by the concept of DC Solar, and expressed keen interest in implementing the technology in the rural and under-developed areas of Andhra Pradesh.

The Chief Minister instructed his Minister for IT, Shri Nara Lokesh, to look into the possibility of collaborating with CYGNI, in order to light up the lives of the under-privileged.

All in all, the event was a huge success for Cygni and Solar DC technology in particular, with both masses and technocrats applauding the breakthrough technology. The icing on the cake was that Cygni Energy won the **Gold Medal** for best innovation at the fair.

Here are a few snapshots from the fair -
