

### Complete Energy Storage System Solutions(ESS)

We design effective ESS solutions to meet customers' energy needs. Cygni battery energy storage systems are best suited for applications that require a fast response time and a high power demand over the short or medium term. They improve the reliability, availability, and efficiency of the power supply. Cygni ESS are ideal for applications like peak shaving, frequency control, and load balancing.

### Stepping into the green era with Next-Gen Technologies

Cygni two-wheeler & E Rickshaw batteries are high-capacity Lithium-Ion batteries available in a lightweight and compact design. Cygni's battery pack comes with a host of new features such as the ability to revive a deep-discharged battery, higher balancing current capability for longer battery life, IOT enabled with CAN and Bluetooth interfaces, and support the battery swapping LockSmart protocol.

**"A transition to clean energy is about making an investment in our future "**

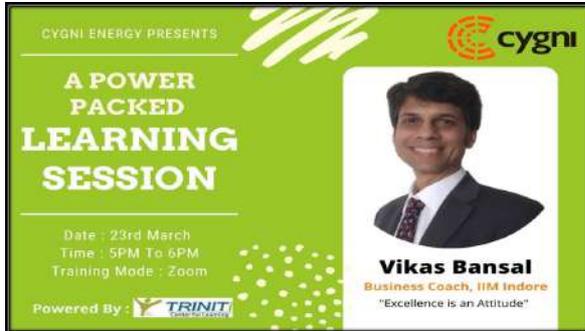

## Solar Impulse Efficient Solution Label

Cygni Solar-DC Inverterless Controller has been awarded the Solar Impulse Efficient Solution Label!

World's First DUAL Input and DUAL Output Solar Backup System with AC & DC output and Compatible Energy Efficient Appliances.

## Training Program on "Excellence is an Attitude"

We were delighted to bring home a dynamic Motivational Speaker Mr. Vikas Bansal | Founder and CEO | Impact Partners. The session engaged us and also inspired us with wide-ranging perspectives and deep insights.

The content of Training includes:

- Going the Extra Mile
- Developing a Winning Attitude
- Achieving Peak Performance

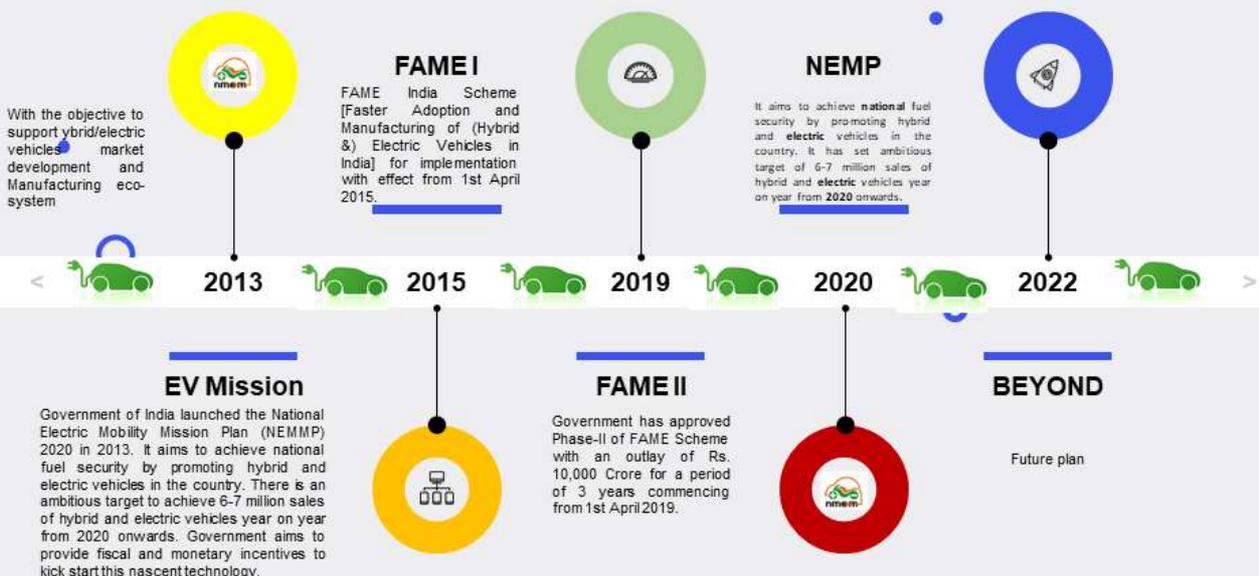

## India e-Biz Electrical & Electronics Expo

Cygni Energy participated in the exhibition by the Indian Chamber of Commerce (vide support of Ministry of Commerce & Industry, Government of India).

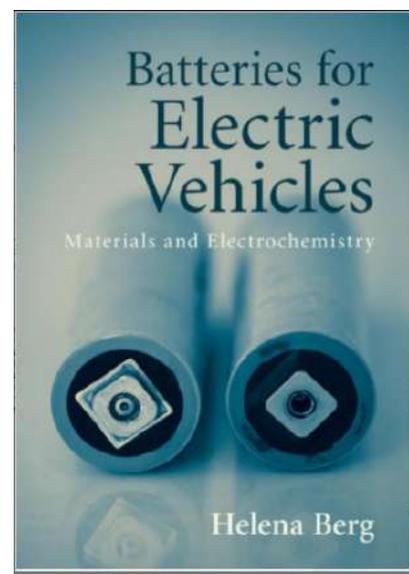

It's a Virtual India e-Biz Expo on Energy, Electrical Equipments & Electronics with Focus on Oceania Countries from 26th - 28th March 2021.

## FAME INDIA SCHEME

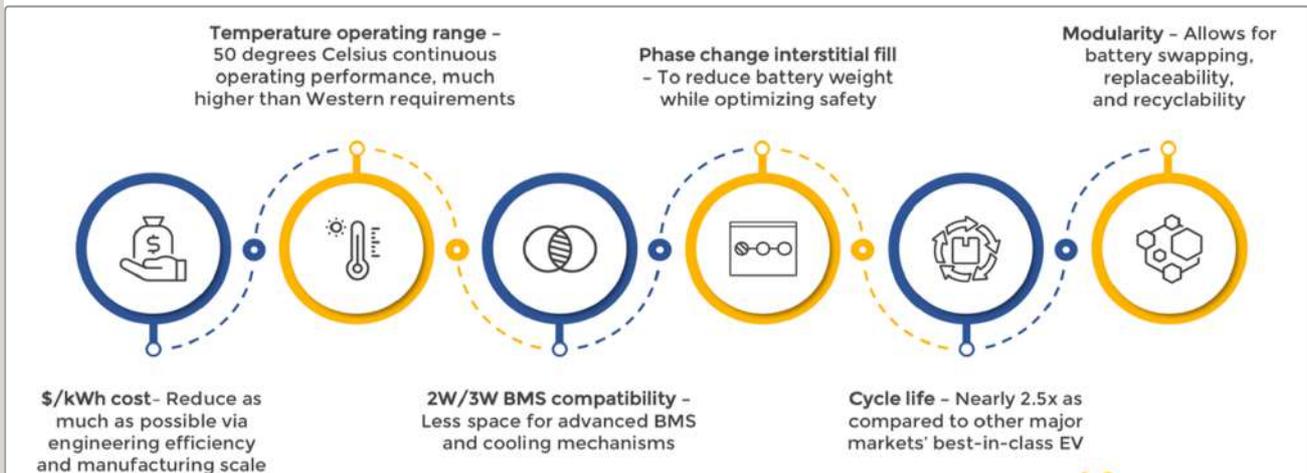

## Book of the month- Batteries for Electric Vehicles- "Helena Berg"

The basics of battery design for electric vehicles. Working through this book, you will understand how to optimize battery performance and functionality, whilst minimizing costs and maximizing durability. Beginning with the basic concepts of electrochemistry, the book moves on to describe the implementation, control, and management of batteries in real vehicles, with respect to the battery materials. It describes how to select cells and batteries with explanations of the advantages and disadvantages of different battery chemistries.

## India specific battery pack design

### Cartoon Of the Month

### Friday Fun Game: The NUTSTACKER

We were enjoyed the Friday Fun Game “Nutstacker”- The goal of the Nutstacker is to create a free-standing tower of metal nuts, by stacking them one on top of the other with one hand holding a stick. The other catch that they have to be stacked on their edges, not lying horizontally. Once the tower is free-standing, the game is completed.

### Upcoming Activities- April 2021

### All Hands Meet

Cygni wide gathering where all employees meet with leadership to discuss company matters. The all-hands meeting will drive transparency and alignment within the team and foster the company culture.

### Ugadi

Cygni will celebrate Ugadi, a major festival in Karnataka (also Yugadi), Telangana, Andhra Pradesh, and Maharashtra (Gudi Padwa), which is celebrated as New Year's Day.

## Holi - The Festival of Colours
